

Animals Quiz

1. What do we call animals that only eat plants?
2. Name one animal that is a mammal.
3. What do fish use to breathe underwater?
4. Can you name an insect?
5. Which animal lays eggs?
6. What do we call animals that eat both plants and meat?
7. Name an animal that lives in a pond.
8. Are lizards warm-blooded or cold-blooded?

Starfish Homework Amazing Animals!

Autumn Term 1st half 2025

Over this half term you need to complete at least 3 activities, including my Maths. **Please listen to your child read every day in addition to the homework activities.** Please hand in, or post on Class Dojo, by the following dates:
Thursday 18th September, the second by Thursday 2nd October and the third by Thursday 16th October.

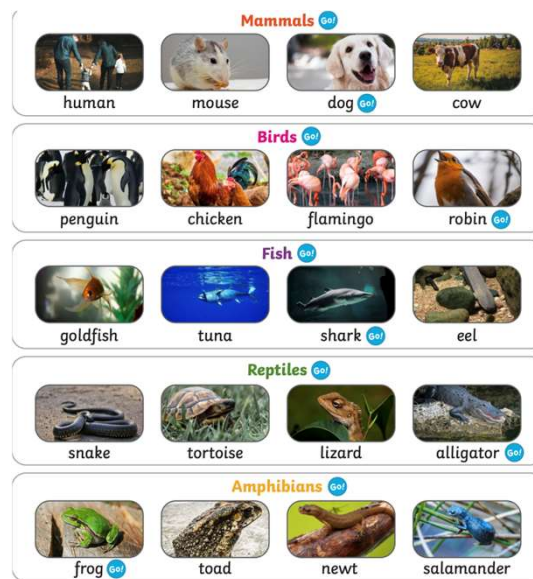

Spellings (Year 2 who have finished the phonics programme only)
Year 2 spelling lists have been posted on Dojo and the children will be bringing home paper copies. Please practise with your child. Although there will be no formal test, children will be writing sentences in class, using these words.

My Maths - It is a good idea to do this as the final activity, once the learning has been covered in class. **You need to do all of the 3 tasks to count as one homework.**

Art - Draw a picture of a favourite animal in its natural environment using a medium of your choice eg. paint, drawing, 3D, collage, playdough etc.

Science/DT- choose a wild animal from anywhere in the world. Research it and make a habitat for it in a box. Bring it in to share with the class! Extension: write a little fact file to go with it.

Quiz - Talk about the questions together at home and write and /or draw the answers to some or all, in your best handwriting.

Key Vocabulary	
amphibians	Amphibians live in the water as babies and on land as they grow older. They have smooth, slimy skin.
birds	All birds have a beak, two legs, feathers and wings.
fish	Fish live and breathe under water. They have scaly skin, fins to help them swim and they breathe through gills.
mammals	Mammals are animals that breathe air, grow hair or fur and feed on their mother's milk as a baby.
reptiles	All reptiles breathe air. They have scales on their skin.
carnivore	Animals that mostly eat other animals (meat) are carnivores.
herbivore	Animals that only eat plants are herbivores.
omnivore	Animals that eat both plants and other animals are omnivores.
